Annual Report 2024

**Yayasan Kolewa
Harapan
Indonesia**

Message from Syta Plantinga, founder.

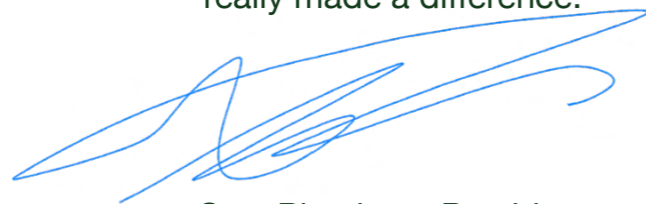

It is January, the time of year when the board of the Kolewa Foundation always starts working on the annual report with great enthusiasm. As I sit behind my desk, I feel a smile appear on my face. It is a task that I do with great pleasure, because it gives me the opportunity to relive everything we have achieved in the past year.

I start writing the text. As I type the sentences, the memories come flooding back: the happy faces of the children who have been helped, the emotional moments of change and growth. Each paragraph takes me back to the projects, the smiling faces of the volunteers, the support of the donors, and the gratitude of the people we have been able to help. It is almost as if I am reliving the year, but now with the distance and the perspective of what we have achieved together.

In addition to writing the text, I also select photos. It is always a special moment to browse through the archive and find those beautiful, emotional images that tell the story. The photos of a child learning sign language for the first time, the smile of a woman who has undergone plastic surgery, or the gratitude in the eyes of parents who can finally hug their children again. Each photo tells its own story, and I feel proud that I can capture the story of the Kolewa Foundation.

With every text and photo I add, my sense of pride grows. It is not just a report; it is a document of the impact we have had, of the change we have brought about. As I relive everything, I feel the gratitude for the people who have made an effort, for the children and adults who have gotten their lives back a little, and for the foundation that makes all this possible.

When I finally finish the report, I look at it with satisfaction. It is not just a document for the outside world, but a reminder for myself of the power of collaboration, care and the tireless efforts of everyone involved with the Kolewa Foundation. I look back with pride, knowing that together we have really made a difference.

Who we are and what we do...

Yayasan Kolewa Harapan Indonesia

Applying UN objectives

The Sustainable Development Goals (SDGs) are seventeen goals to make the world a better place in 2030. They are a global compass for challenges such as poverty, education and the climate crisis. Kolewa's work contributes to these goals.

Good care and a strong society: The social structure in Indonesia is different from that in the Netherlands, which is why the Kolewa team focuses on communities. A child who cannot receive good care remains a concern for the community. Because the child can lead a normal life again, a future is created, not only for the child, but for the entire community around the child. That is why Kolewa's work is so effective, we not only help the child, but strengthen the future of the entire community of often dozens of people. Because this concerns the poorest in Indonesia, we provide extra support to create a healthy living environment for the child. In this way, we contribute to SDG 3: Good care and Well-being and SDG 10: reducing inequality.

Identifying children in need of medical care: With the Medicar, the Kolewa team travels to poor areas in Bali where people live who are unable to visit a hospital or doctor themselves. Posters inform the population about the possibility of having cleft lip and palate children operated on free of charge. Midwives, who play an important role in the villages, are often the first to notice that something is wrong with a child. The Kolewa team tells about the other activities of Kolewa during meetings of midwives affiliated with Puskesmas (child health clinic). The children who qualify for care and shelter in Rumah Bicara are born with cleft lip and palate, hearing impairment, anal atresia, spina bifida and children who have suffered burns. Our Medicar is equipped with first aid items, such as bandages, baby food, pacifiers, clothing and vitamins, so that – if necessary – first aid can be provided immediately. The Medicar, and our Suzuki minibus, are also used to transport children to the hospital in Denpasar. With this we support SDG 3: Good Healthcare and Wellbeing.

Healthcare for children of Indonesian islands: Indonesia has very isolated and poor islands such as Timor, Rote, Flores, Sumba and the Moluccas. Medical care is limited and surgical interventions are impossible. That is why our Kolewa team accompanies patients from other islands for examination and operations to the hospitals in Bali: SDG 3 Good Healthcare and Wellbeing.

Clean water supply: A large part of the Indonesian population does not have a connection to the tap water and because bottled water is unaffordable for them, they are dependent on river or rainwater. Drinking this highly polluted water causes diseases, especially in children. Kolewa offers a simple and cheap solution by means of the Water Filter Set. This consists of two buckets and a Tulip the filters. With this we support SDG 6: clean water and sanitation.

Baby food, food parcels and aids: We support the poorest communities in their basic needs. Children with cleft lip and palate need a basic weight to be able to undergo their operation. Unfortunately, these children do not always have that. We provide baby food so that the desired weight is achieved. A few times a year we bring a food parcel with a supply of rice, noodles, oil, flour and other basic products. With this we contribute to SDG 2: no hunger.

Health insurance: In we have a state insurance for poor people, the BPJS. This insurance does not provide relief for cleft lip and palate patients. For the other conditions that Kolewa focuses on, the reimbursement is often not sufficient. Kolewa then supplements where necessary. We encourage patients and caregivers to register for this. In this way we support SDG 3: good Care and Well-being.

Social activities in collaboration with the Dinas Sosial

Meeting dr. Miranda Johannes, ophthalmologist from Jakarta in Sanur

attending a presentation about waste management in Sanur

social activities in collaboration with governmental organisation representatives

Marriage of team members Heldi and Klemen

The Kolewa Foundation is deeply honored to receive this recognition

The Kolewa Foundation received a prestigious award certificate from the Dinas Sosial Kota Denpasar during the celebration of National Social Solidarity Day and International Disability Day. The award, titled "Vasudhaiva Kutumbakam" (meaning "The World is One Family"), was presented as a token of appreciation for the Foundation's consistent support and active involvement in advancing social welfare within the Denpasar community.

The recognition highlights the Kolewa Foundation's dedication to improving the lives of vulnerable individuals and fostering a more inclusive society, and acknowledges the Foundation's impactful programs in areas such as education, healthcare, and community development, particularly benefiting children with special needs.

Time for a small celebration with the team!

Offering children medical help and giving them a future with a **SMILE**

Numbers of patients and guardians hosted in Rumah Bicara and Kolewa Gang period January - March 2024:

January

Short stayers cleft lip / open palate

* 9 patients / 9 guardians

Long stayers

* 8 patients / 8 guardians

February:

Short stayers cleft lip / open palate

* 12 patients / 12 guardians

Long stayers

* 8 patients / 8 guardians

March:

Short stayers cleft lip / open palate

* 15 patients / 15 guardians

Long stayers

* 9 patients / 9 guardians

During the period April - June 2023, we hosted:

April:

Short stayers cleft lip / open palate

• 8 patients / 8 guardians

Long stayers

• 7 patients / 6 guardians

May:

Short stayers cleft lip / open palate

• 14 patients / 14 guardians

Long stayers

• 7 patients / 6 guardians

June:

Short stayers cleft lip / open palate

• 14 patients / 14 guardians

Long stayers

• 7 patients / 7 guardians

Numbers of patients and guardians hosted in Rumah Bicara and Kolewa Gang period July - September 2024:

July

Short stayers cleft lip / open palate

* 9 patients / 8 guardians

Long stayers

* 12 patients / 12 guardians

August:

Short stayers cleft lip / open palate

* 10 patients / 10 guardians

Long stayers

* 11 patients / 11 guardians

September:

Short stayers cleft lip / open palate

* 9 patients / 9 guardians

Long stayers

* 10 patients / 10 guardians

Numbers of patients and guardians hosted in Rumah Bicara and Kolewa Gang period October - December 2024:

October:

Short stayers cleft lip / open palate

* 7 patients / 7 guardians

Long stayers

* 11 patients / 11 guardians

November:

Short stayers cleft lip / open palate

* 9 patients / 9 guardians

Long stayers

* 10 patients / 10 guardians

December:

Short stayers cleft lip / open palate

* 15 patients / 15 guardians

Long stayers

* 8 patients / 8 guardians

Transforming Lives through Surgical Intervention:

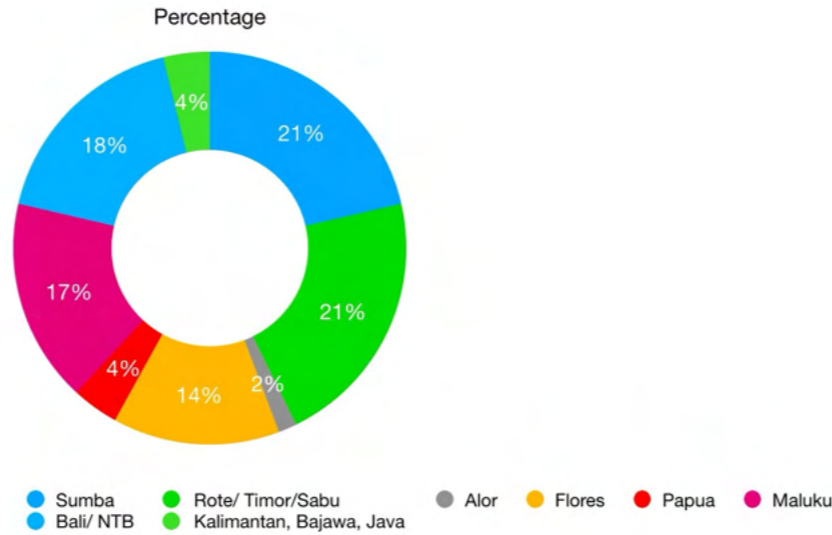

This year, Yayasan Kolewa continued its vital mission of providing life-changing surgical interventions to children in need. Numerous young lives were positively impacted through the organization's unwavering commitment to addressing critical medical conditions that could be effectively treated through surgery.

Yayasan Kolewa's work encompasses a range of crucial activities:

- Identification and Assessment: Working closely with hospitals in Denpasar, and healthcare professionals to identify children in need of surgical intervention and to determine the most appropriate course of treatment.
- Covering the full spectrum of surgical costs: Pre-operative assessments and consultations, post-operative care and rehabilitation, medications and medical supplies
- Logistics and Coordination: Arranging transportation for children and one of their family-members to reach designated medical facilities. Providing accommodation and support during their stay at the hospital.
- Coordinating with medical teams to ensure seamless and timely care
- In total we offered 131 children born with cleft lip and palate a medical journey and 25 patients with Burns, anusatresia or spina bifida.

Cleft lip, palate and bonegraft surgery 2024

Home island	
Sumba	28
Rote/ Timor/Sabu	28
Alor	2

	131

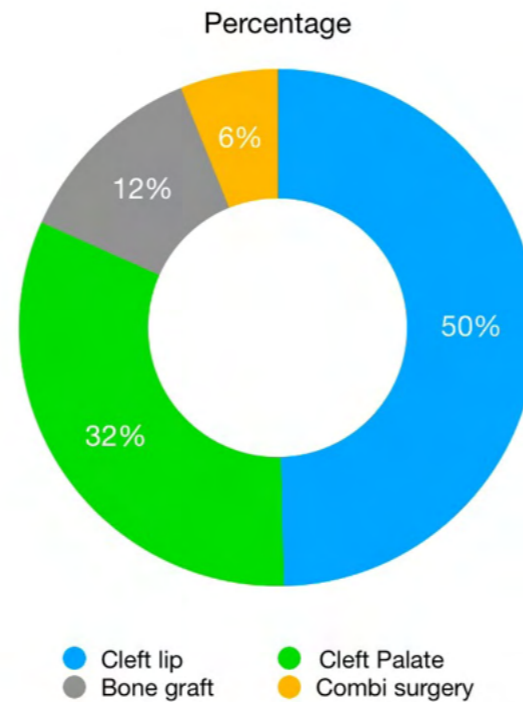

All surgery took place in Bali; most patients came from NTT, NTB and Moluccan islands. Scouting and monitoring is on each island supported by local free-lance scouts. Kolewa team members took in 2024 frequently domestic flights to guide patients and guardians. We collaborated with Dharma Yadnya Hospital and Bali Mandara Hospital.

Cleft lip, palate and bonegraft surgery 2024

Surgery	
Cleft lip	65
Cleft Palate	42
Bone graft	16
Combi surgery	8
Total	131

Pre-surgery Dental Care, speech therapy, woundcare and daily activities such as creativity and going outside.

Pre-surgery dental care is crucial before plastic surgery on cleft lip or cleft palate for several reasons: Poor oral hygiene can lead to infections, which can significantly increase the risks associated with surgery. All kids above 5 years do go to field partner Dental 911 for a check-up.

At Kolewa Foundation, we understand that healing is more than just medicine. While our commitment to providing top-notch medical care remains unwavering, we recognize the profound impact of play and recreation on a child's overall well-being, especially during challenging times.

Hospital stays and medical procedures can be frightening for children. Playtime offers a much-needed escape, allowing them to relax, unwind, and forget their worries for a while.

Our Kolewa Foundation team does believe that a holistic approach to care is essential. By providing a nurturing environment where children can play, laugh, and simply be kids, we contribute significantly to their emotional, social, and physical wellbeing.

“Longstayers”: Anusatresia, Spina Bifida and Burns.

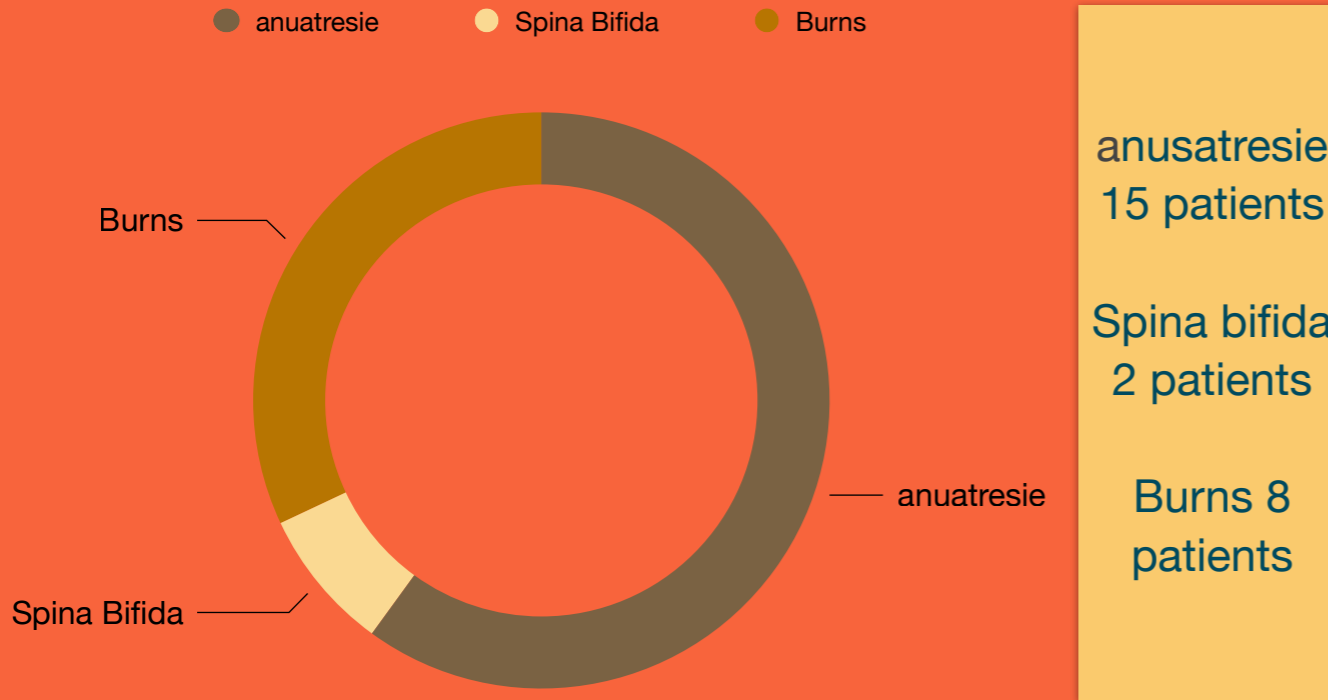

Patients with anorectal malformations (ARM), burns, and spina bifida often require significantly longer stays in shelter homes compared to those with cleft lip or palate.

ARM: These conditions involve abnormalities of the anus and rectum, often requiring multiple surgeries and complex post-operative care. Bowel function may need to be re-established gradually, which can take time.

Burns: The severity of burns varies greatly. Extensive burns necessitate prolonged hospitalization and rehabilitation due to the risk of infection, scarring, and potential complications like contractures.

Spina Bifida: This neurological condition can cause various issues, including paralysis, bowel and bladder problems, and hydrocephalus (fluid buildup in the brain).

Management involves multiple surgeries, therapies and long-term care.

All treatment for our so-called "longstayers" took place in the Ngoerah Hospital in Denpasar using the BPJS insurance. The average stay of length in our shelter home is six to 9 months, sometimes up to one year.

“Food support from The Kolewa kitchen”

Every week we distributed 100 fresh meals to people working in the garbage , street sellers and parking attendants in Denpasar city. A token of appreciation for the poorest of the poor.

Special support to former patients and families in need:

Ingky, living in Kupang Timor, is our former burns patient; we offered him a scholarship in Kupang at the University for agriculture. He graduated in September 2024.

Families with a baby, born with cleftlip/palate, received babyfood support to gain weight.

On a regular base we deliver a food pack to people with a very low income in Bali and Kupang.

Patrick, again a victim of a burn-accident living in Kupang, has also a severe eye-problem. He needed new glasses to be able to perform good in school.

Angel, a girl with spina bifida in Kupang, needed in 2024 financially support for transportation to the SLB-school and buying special diapers to solve her incontinentie problem. She came to Bali last August to get new special shoes at Annika Linden center

In special cases we made sure that very young & poor couples get support by setting up their household. Together with local hotels we brought them a mattress, bedsheets, towels and furniture .

Offering a helping hand to the blood bank in Bali

The Kolewa Foundations' supported with healthy meals for blood donors at on-location blood drives in Bali, it was incredibly helpful to the Bloodbank for several key reasons:

Blood donation can cause temporary side effects like dizziness or fatigue. A nutritious meal helps replenish energy levels and stabilize blood sugar, ensuring donors feel better faster.

Providing a meal shows appreciation for the donors' time and generosity, creating a more positive and supportive experience that encourages repeat donations.

Children with hearing problem

Yayasan Kolewa Harapan Indonesia

Using sign language for communication changes their lives, but first, we test hearing loss carefully! A large group (over hundred) of kids and parents is already following our program for years.

"In Denpasar, located not too far from the Kolewa Foundation, is Lumina Hearing Center. Equipped with facilities for testing young children, this center provides easy access for our patients with hearing problems.

During our outreach activities across Bali, we regularly identify children with hearing impairments. In such cases, we offer assistance and free hearing tests at the Denpasar center.

Many of the children and parents who seek our help require special education. These children often live in isolation and do not attend school. If parents avail themselves of our free testing and device offers, they agree to enroll their child in our weekend speech therapy and sign language program.

Parents also expressed a strong desire to learn themselves and practice sign language to improve communication with their deaf child.

In 2024, we continued our specialized parent training program twice a week in Denpasar (30 participants) and Karangasem (45 participants). The overwhelming enthusiasm of the participants has resulted in significant progress in their communication with their deaf or hard-of-hearing children at home."

Kolewa organizes weekly speech therapy and sign language classes to support children with hearing problem. These sessions designed to help them improve their communication skills and build confidence. Classes are held both in Denpasar and Karangasem, ensuring accessibility for more families in need. We received numerous donations of hearing aids and batteries, which were distributed to Lumina to support Kolewa's deaf children.

speech therapy & sign language at 2 locations

Speech therapy and sign language classes for children with hearing impairment in Denpasar and Karangasem did run smoothly. Our field partner, Lumina Hearing Centre, and the teacher from Sushrusa School joined our program in Karangasem twice a month on Sunday morning. The kids in Denpasar regularly come directly to Lumina Hearing Center to maintain their hearing aids and ensure their devices are in good condition.

Special education for deaf and badhearing children in Bali.

"Twenty-one Kolewa children with hearing impairments attend the Sushrusa Deaf School in Denpasar daily for specialized sign-language education. Our driver, Komang, transported them to and from school using our dedicated school bus. Twice a week, these children also come to our shelter home for supplementary lessons and a nutritious meal.

It is truly inspiring to witness the children's growth, their enthusiasm for learning, and their eagerness to thrive. We cherish the opportunity to see them perform and regularly invite them to showcase their talents at our events."

In december the kids were invited to the Christmas-party, organized by Rotary Club Bali Nusa Dua.

Family Gathering 2024,
Bali and Ambon.

Yayasan Kolewa Harapan Indonesia

"A Day at the Ranch: An Unforgettable Experience for our Deaf Children"

For our deaf Kolewa children, a recent visit to the horse-riding center in Ungasan was an unforgettable adventure. Many had never even seen a horse before, let alone ridden one!

The day began with an introduction to the horses. The children learned about their different breeds, sizes, and personalities. They were taught how to approach a horse safely, how to groom them, and how to lead them. The staff at the center were incredibly patient and communicated using a combination of sign language and gestures.

The highlight of the day, of course, was the riding experience. With the help of experienced instructors, each child was carefully paired with a horse suited to their size and confidence level. They learned basic riding positions and how to guide the horse with gentle cues. The smiles on their faces as they felt the rhythm of the horse beneath them were priceless.

Beyond the riding, the children gained valuable life skills. They learned about responsibility, patience, and respect for animals. They also developed their communication skills, both in sign language and through observation and interaction with the horses.

This experience was more than just a fun outing; it was a valuable opportunity for our deaf children to connect with nature, build confidence, and expand their horizons. It was a day filled with joy, laughter, and unforgettable memories.

*The children helped prepare the horses for riding.

*They learned about horse tack and how to put on a saddle.

*They enjoyed a picnic lunch at the ranch.

*The children shared their experiences with each other using sign language.

Family gathering Ambon

Every year, the Yayasan Kolewa Harapan Indonesia team organizes a "family gathering" on one of the island groups. This year, we invited children from the Moluccan islands of Ambon and Seram to participate in a weekend event in Ambon city.

During these gatherings, we conduct follow-up check-ups on children who have undergone surgery. Sometimes, the jaw doesn't develop correctly, or palate issues arise. We also provide additional speech therapy and dental hygiene lessons. While the children are engaged in arts and crafts activities, the parents participate in seminars.

This year, interns Maud and Lieke gave presentations on personal hygiene. Team member Uttari, a midwife, discussed pregnancy, childbirth, and infant care. A delegation from the government health insurance program, BPJS, explained the benefits of having government health insurance.

In total, 32 children came to the family gathering, each accompanied by at least one parent. The Kolewa team arrived a day in advance to welcome them."

A large number of the children present had already undergone at least one surgery in Bali. They stayed in our care home, "Rumah Bicara," for a few weeks, and even there, they learned the importance of good oral hygiene. However, it never hurts to reinforce this message, so each child received a new toothbrush and toothpaste."

It was an incredibly exciting and rewarding moment for the Kolewa Foundation to receive such recognition from Plt. Yan Aslian Noor, MPH, Head of the Dinas Kesehatan (Health Office) in Ambon, during the family gathering! This kind of appreciation not only highlights the foundation's dedication to our work, but also validates the impact we are making in the community. Having the Head of the Health Department acknowledge our efforts in front of a gathering of families was both humbling and motivating for everyone involved. It's moments like these that strengthen our foundation's resolve to continue making a difference and inspire others to get involved too.

Kolewa Foundation partnered in October with The Lions Club Bali to distribute 15 Tulip water filters to families in need in the Karangasem region. During the distribution, Foundation Chair, Ana, emphasized the transformative impact of these filters, providing access to clean water for families living in extreme poverty. These families often lack access to basic necessities, including clean drinking water," Ana explained. "The Tulip water filters are a game-changer. They not only provide safe drinking water, but also significantly improve the health and well-being of these families, particularly children."

In total we visited 63 families that don't have access to clean drinking water. 63 complete sets in Karangasem and Tabanan area. Besides that we made unannounced home visits to families who had previously received a waterfilter. We were satisfied to see that most of these people use the filter in the right way. For those who were using the filter almost two years we changed 48 candles in Bali.

Kolewa Foundation Goes Digital: New Website Launched in Bahasa Indonesia!

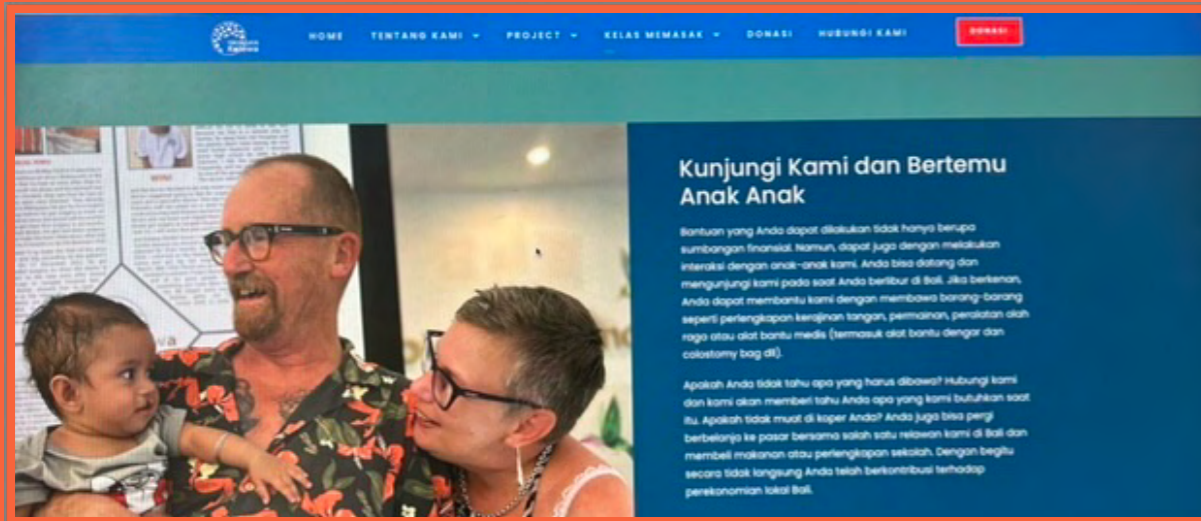

We are thrilled to announce the launch of our brand new website, now available in Bahasa Indonesia! since December 2024.

This exciting development will allow us to better connect with our Indonesian-speaking communities and supporters.

Visit us at www.kolewa.id to learn more about our mission, ongoing projects, and how you can get involved in supporting children in need of medical assistance.

The new website features:

- **Informative content:** Comprehensive information about the foundation's mission, goals, and the impact of their work.
- **Engaging visuals:** Images and videos that showcase the human stories behind Kolewa Foundation's work.
- **Easy donation options:** A secure platform for supporters to contribute to the foundation's vital initiatives.
- **Bahasa Indonesia accessibility:** The website's content is now fully accessible in Bahasa Indonesia, making it easier for Indonesian audiences to learn about and engage with Kolewa Foundation.

You can also find us on social Media

We believe this new website will be a valuable resource for our Indonesian-speaking supporters and a powerful tool for raising awareness and funds about the charity work we do.

Publicity:

SatuNama came to Bali to create a movie about the Kolewa Foundation because of the foundation's impactful work in helping children who face hearing impairments, like Febi. The foundation is dedicated to offering hope and opportunities to these children, and SatuNama recognized the importance of sharing this story with a wider audience. By highlighting Kolewa's efforts, SatuNama aimed to bring attention to the transformative work the foundation does in the community, raising awareness about the challenges these children face and the ways the foundation is helping them rediscover their dreams. Through this collaboration, SatuNama hoped to inspire others to contribute to the cause and support the foundation's mission.

The movie is published on YouTube, it also shows how a successful fundraiser was organized by the team of the Yayasan.

Baliberkarya.com - Denpasar. Walikota Denpasar, I Gusti Ngurah Jaya Negara menyerahkan secara simbolis bantuan paket sembako kepada Orang dengan skizofrenia (ODS) di Rumah Berdaya Denpasar, Jumat (1/3). Hal tersebut merupakan bentuk dukungan Pemerintah bersama berbagai organisasi sosial dalam mendukung kesejahteraan ODS di Kota Denpasar.

Dimana, dalam kesempatan tersebut sebanyak 37 paket sembako disalurkan kepada 37 orang penerima. Adapun bantuan paket sembako tersebut merupakan bantuan dari Yayasan Peduli Anak Kanker Bali sebanyak 12 paket sembako serta dari Yayasan Kolewa sebanyak 25 paket sembako. Disela-sela kunjungannya dan penyerahan sembako di Rumah Berdaya, Walikota Denpasar, I.G.N Jaya Negara sempat membeli sebuah karya lukis dari Orang dengan skizofrenia (ODS).

Walikota Denpasar, I Gusti Ngurah Jaya Negara dalam kesempatan tersebut mengucapkan terima kasih kepada pihak-pihak yang telah senantiasa membantu memberikan bantuan kepada warga rumah berdaya. Bantuan ini tentu sangat memberikan manfaat serta bersama-sama berkolaborasi dalam memberdayakan Orang dengan skizofrenia (ODS) sesuai dengan spirit Vashudhaiva Kutumbakam.

foreign visitors did use our Dutch online moneybag to donate.

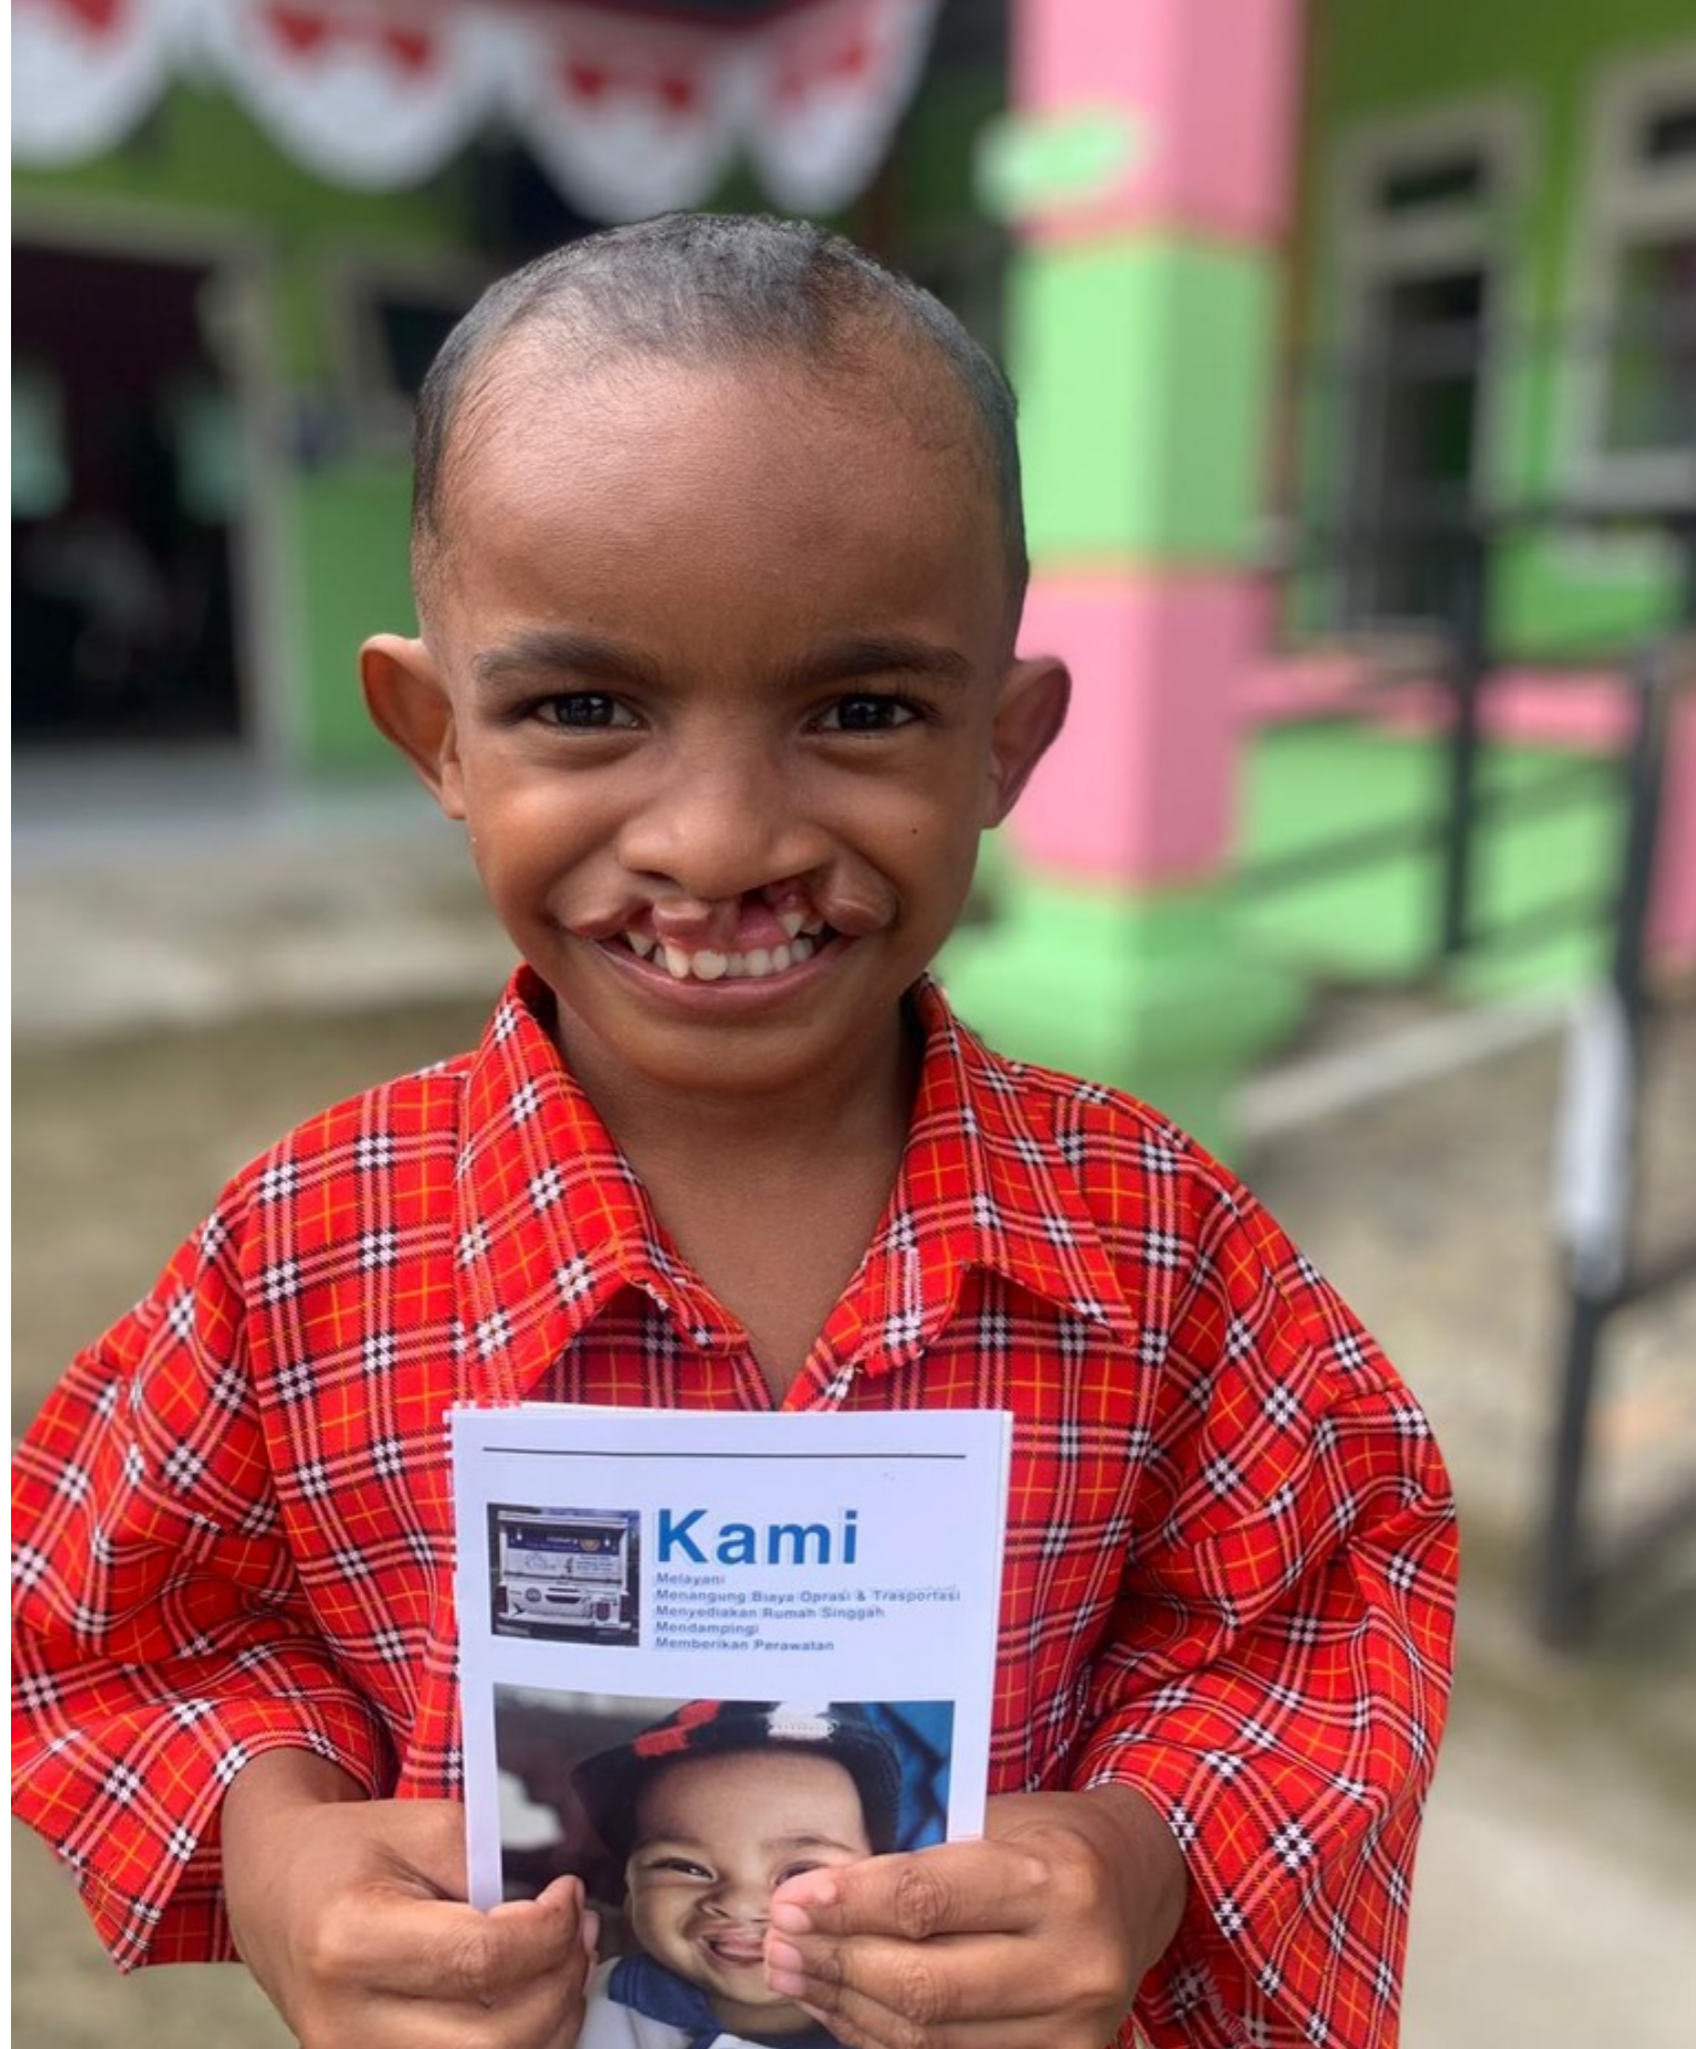

Kita Bisa: is an Indonesian crowdfunding platform that allows organizations like Kolewa to raise money. The platform was designed to be user-friendly and accessible to people of all backgrounds. With some assistance of the Kita Bisa advertisement group we started 4 opportunities for people to donate in 2024. Kita Bisa looks like a powerful tool that we do hope to use again next year in order to get more awareness and money for our projects in Indonesia.

Kolewa Foundation Streamlines Donations with QR Codes

In 2024, Kolewa Foundation introduced a convenient and efficient way for supporters to contribute: QR codes. This innovative approach simplifies the donation process, making it easier than ever to support children in need of medical assistance.

Simply scan the QR code with a smartphone camera, and one will be instantly directed to our Mandiri account details. From there, people can easily make a secure online transfer.

"We understand that time is precious," says Ana, Chair of Kolewa Foundation. "The QR code system eliminates the need for manual entry of account numbers, making the donation process quick and seamless. This allowed our supporters to contribute effortlessly while ensuring their gifts reach the children who need them most."

Financial report 2024

Donations 2024

In 2024, Kolewa Foundation received consistent support from our Dutch counterpart, Stichting Kolewa. These donations, fourth time a years. Generated through fundraising efforts in the Netherlands, were crucial in sustaining our charitable programs. In december 2024 we received in advance for the first semester 2025 IDR425.000.000.

Furthermore, the Rotary Club Bali Nusa Dua generously contributed towards the costs of accommodating Cleft Lip and Palate (CLP) patients and their transportation to hospitals.

Additionally, the invaluable support of visitors, churches, and local entrepreneurs, often in the form of goods and food donations, significantly supplemented our resource.

The year 2024 commenced with a strong financial footing, boasting an opening balance of IDR 1,942,418,904, inclusive of the advance payment for the first quarter of 2025. Throughout the year, Yayasan Kolewa Harapan Indonesia received a total of IDR 5.143.819.867. This significant inflow comprised generous support from our Dutch counterpart, Stichting Kolewa, contributions from compassionate visitors, and a substantial grant from the Rotary Club Bali Nusa Dua towards our cleft lip & palate project.

Furthermore, our prudent financial management yielded IDR 92.250.966 in interest income.

In fulfilling our mission, Yayasan Kolewa diligently utilized IDR 3,425,587,156 to implement various impactful projects across our programs. This expenditure aligns with our budget projections, which estimated total costs at IDR 3,745,500,000.

This responsible financial stewardship allows us to enter 2025 with a strong financial position, enabling us to allocate a portion of our remaining funds towards the initiation of new projects that will further enhance the well-being of the communities we serve in 2025 - 2030.

Closing word from Chair, Ibu Ana

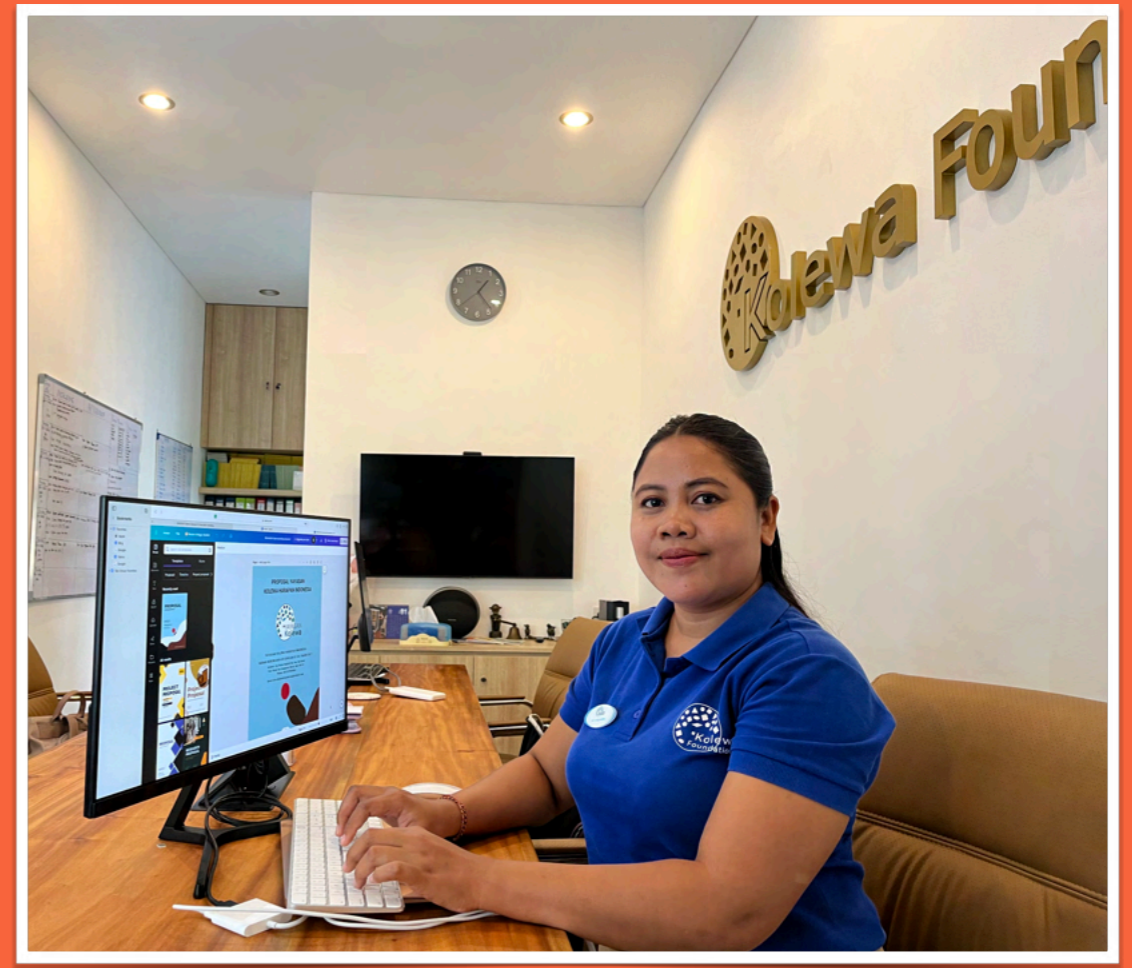

Reflecting on 2024, I am filled with immense gratitude for the unwavering dedication and compassion of our entire Kolewa Foundation team. Together, we have navigated challenges, celebrated victories, and consistently placed the well-being of children in need of medical assistance at the heart of all our endeavors.

Guiding our team has been a privilege. I believe in fostering a collaborative and supportive environment where every member feels valued and empowered to contribute their unique skills and perspectives. Witnessing the impact of our collective efforts – from providing critical surgeries to ensuring access to quality healthcare – or special education for deaf children has been an incredibly rewarding experience.

The needs of these children continue to inspire me deeply. Their resilience, their courage, and their unwavering hope in the face of adversity serve as a constant reminder of the importance of our mission. I am committed to continuing to raise awareness of their needs, and to work tirelessly to ensure that every child receives the medical care they deserve.

As we move forward into 2025, I am confident that with the continued support of our generous donors, dedicated volunteers, and the unwavering commitment of our great team, Kolewa Foundation will continue to make a significant and lasting difference in the lives of children in need.

Ni Luh Juliani, chair.
